

Energy Monitoring

See. Save.

Greater energy visibility for lower energy costs.

Stop energy waste in its tracks. Edison Energy® Energy Monitoring is the proactive approach to optimizing your facility's use of electricity, natural gas, water, steam—even greenhouse gases. Relying on web technology that we created and drawing upon decades of energy management experience, the Energy Center monitors your facility's operations 24/7.

FEATURES

Proprietary technology: Our custom, cloud-based technology allows us to monitor your energy usage and spend continually. In the process, we can find savings opportunities quickly so you can take immediate action to optimize your overall use of energy.

Expert support: We have deep experience in interpreting the data and analytics, filtering out false alerts and noise and, in general, providing you with actionable recommendations—so there is no need for you to learn sophisticated software or interpret complex reports.

24/7 accessibility: As we monitor your usage from our network operations center, you can manage, measure and review your energy costs and usage in near real time. You will receive immediate alert notifications about energy waste, excess consumption or overspending.

Technology-enabled transparency: Our recommendations are driven by system analytics, which are always available to you for full visibility.

Customized: Dashboards are tailored to your unique site and project needs, enabling detailed, customized reporting and forecasting of your energy costs and use. Baseline report comparisons illustrate weather and production impact.

BENEFITS

Savings: Energy monitoring lets you manage, measure and review your energy costs in real time, leading to [greater energy efficiency and long-term savings of up to 40%](#).

Faster troubleshooting: You'll minimize the risk of down time by receiving immediate alert notification whenever issues are detected.

Improved O&M: By troubleshooting problems as they arise, you ensure your energy systems last longer with fewer costly repairs.

Long-term performance: You get highly personalized, ongoing measurement, and assurance through verified energy projects to achieve long-term energy efficiency and renewable energy goals.

WHAT MAKES US DIFFERENT?

Strong: Our depth of resources and expertise make us an ideal partner for high-quality, high-value energy services.

Independent: Since we don't manufacture products, we are entirely unbiased and offer best-in-class options for you, regardless of the source—based solely on your requirements.

Entrepreneurial: We offer the creativity and nimbleness of a small firm and the financial stability of a Fortune 500 parent company, with over 130 years of energy innovation.

WHO WE'VE WORKED WITH

Our Energy Monitoring clients include:

INSTITUTIONAL

PRINCETON UNIVERSITY
UNIVERSITY OF RICHMOND
VirginiaTech
