

Engineering, Procurement & Construction

Integration. Experience.

Seamless collaboration for long-term energy project success.

Edison Energy delivers full-service design, build, development and implementation services. Whether it's a solar project to reduce your carbon footprint or more traditional improvements such as HVAC or lighting, we base our approach on customized technical assessments and energy studies, encompassing every major energy technology and Energy Conservation Measure (ECM) installation type.

FEATURES

Sector expertise: Our depth and breadth of expertise extends to commercial, industrial, healthcare and higher education.

Start-to-finish solutions: Comprehensive services for HVAC, boilers, solar, controls, lighting and all other technologies are available.

Versatile: If you need it, we can provide project financing, engineering, procurement, construction and O&M services. You select the level of support that is right for you.

Strategic: We start with an assessment of your energy and renewable energy needs and goals, then create a plan customized for you.

Turnkey: From initial studies to financial analysis and financing, construction implementation and operations through commodity procurement of gas and electric, we've got it covered.

Full life cycle: We can ensure financing, operational management and maintenance of your energy assets, or take full responsibility with our Managed Energy Services.

Open-book pricing: You get full transparency into our deal structure, allowing you to see how your cost/unit price is established.

BENEFITS

Savings: Reduce energy-related OpEx and CapEx over an extended period of time (often 10-20 years).

Sustainability: Achieve your carbon reduction goals by providing renewable energy at or below your current cost/unit.

Reduced risk: We eliminate all business and technology risk associated with deploying new energy systems.

WHAT MAKES US DIFFERENT?

Heritage: Inspired by our 130-year history, we have expertise in both traditional and cutting-edge energy technology.

Strong: Our depth of resources and expertise makes us an ideal partner for high-quality, high-value energy services.

Independent: We don't manufacture products, so we are entirely independent and offer best-in-class options for you, regardless of the source.

Engineering excellence: All engineering and design work is done in-house to the highest standards.

Dow Jones Companies

VISION

To be a responsible consumer of energy and resources, as well as a positive influence in the communities where we work and live.

CASE STUDY // COMMERCIAL

Helping the Dow Jones Companies reach carbon neutral goals

SCOPE

For this 4 MW solar carport installation, our services included:

- › Design review, analysis and negotiation of the Design Build Agreement
- › Project management support and technical support
- › Design of the testing procedures to ensure the solar system met production requirements
- › Construction management oversight
- › Commissioning and system training services to maintain proper quality control throughout the entire project

CUSTOMER VALUE

The 4 MW solar system provides approximately 4,464,819 kWh annually

Engineering, Procurement & Construction is just one of the many solutions Edison Energy offers to benefit your organization. Contact us today at information@EdisonEnergy.com

Edison Energy is an independent energy advisory and solutions integration company with the capabilities to develop and implement a broad portfolio of energy services for commercial, industrial and institutional organizations. We help customers reduce their energy costs, improve the environmental performance of their operations, ensure energy resiliency and manage exposure to energy price risk.
