

# Off-site Renewables

## Renewables. Delivered.

Our experts can help add low-cost renewable energy to your portfolio.

Edison Energy's experienced in-house team works with you to identify, analyze and execute off-site renewable energy opportunities so you get the low-cost energy you need to mitigate price risks and achieve your sustainability goals.

### FEATURES

**Custom criteria profile:** We work with each customer to develop their specific selection and valuation criteria for renewables supply. This ensures that internal and external stakeholders' needs are met.

**Comprehensive market access:** The Altenex Marketplace™ connects you to the renewable project developers that make the most sense for your business, based on your energy usage, risk tolerance and selection criteria.

**Best-in-class analytics:** We analyze more than 100 layers of performance and risk data for every renewable energy project we consider.

**Proven track record:** We have helped customers execute more than 1.4 gigawatts (GW) of renewable energy transactions, ranging from 1 to 228 MW of off-site renewables.

**Strategic approach:** We align your energy needs and enterprise objectives against a range of renewable energy options, then help you set appropriate goals and design and implement a renewables strategy that saves money and mitigates risk across your overall energy portfolio.

**PowerBlocs™:** Our unique, innovative approach to structuring right-sized renewable energy supply has revolutionized off-site renewables. Edison Energy offers smaller and shorter-duration renewable energy off-take agreements.

**Long-term support:** Long-term invoicing and settlement support ensure you're receiving the energy and environmental performance you have contracted.

### BENEFITS

**Cost savings:** Renewable energy is progressively becoming less expensive than buying from the grid

**Risk protection:** Adding renewable energy to your portfolio reduces energy price volatility and addresses any current or future regulatory requirements

**Sustainability:** Renewables reduce greenhouse gas emissions and are a cornerstone of corporate sustainability engagement and strategies

**Risk mitigation:** Long-term renewables protects your company against price volatility risk

## WHAT MAKES US DIFFERENT?

**Deep analytics:** We provide the most sophisticated analytics suite around renewable energy anywhere in the market. This ensures optimal risk management and financial valuation.

**Comprehensive access:** The Altenex Marketplace™ is a proprietary, dynamic database of every renewable energy project in North America that gives you access to every potential option.

**Independence:** We're a third-party advisor that can look across the entire landscape of suppliers, developers and projects and make fully-independent assessments.

**Innovation:** From our analytics suite to our proprietary renewables contract to our PowerBlocs™ PPA, we continue to expand what's possible in renewables.

**Track record:** We have helped customers execute more renewable energy procurements than any other service provider.
